Position: Web & Flash Designer

Since February 2008 - February 2008: Cayenne

Location: Milan - Italy

Position: Web Designer

Since February 2008 - ...: MRM Worldwide (www.mrmworldwide.com)

Location: Milan - Italy

Position: Web, Flash & Motion Designer

I have been employed in MRM for my creative skills along with my flash abilities.

Initially, my job involved mainly the concepting and creation of creative graphical solutions for a project, and sometimes the technical development of them.

My innovative creative approach and my continuous interest in experimenting new solutions allowed me to take over a new, transversal role within the agency as a creative/tech specialist for the development of high-impact content.

I am now involved on all of the agency's projects that require production of engaging flash animations and/or motion graphics footage for the web, in every step of their development.

I know all the main graphic softwares (i.e. Photoshop & Flash & After Effects & Cinema4D, ecc) and i am interested in continuously learning new ones in order to be able to integrate them and achieve the best results.

I also have basic programming/developing skills in actionscript 2.0 and 3.0, xml, php and asp, that i mainly use to rework existing code in order to achieve my needs.
